7	How do you rate the applicability of the domains and the tools used for designing the experiments in terms of existing practices in the Industry?	60	40	0	0	0
8	How do you rate the experiments in terms of their relevance to the real life application?	100	0	0	0	0
9	How do you rate the proficiency of our students working with you?	100	0	0	0	0

The first question was about the rate relevance of the courses in relation to the program. The feedback given should be the choice like excellent, very good, good, average and poor in all the questions in the curriculum. Eighty percent commented excellent and 20% graded very good (Fig. 1). The second question was about the sufficiency of the courses related to industry that are included in the program. The entire employees agreed with this (Fig. 2). Third and 4th question was about the competencies/ outcomes in relation to the course content and relevance of the topics to the industry. Forty percent employee marked excellent for both the questions and 60% responded very good (Fig. 3 and Fig. 4).
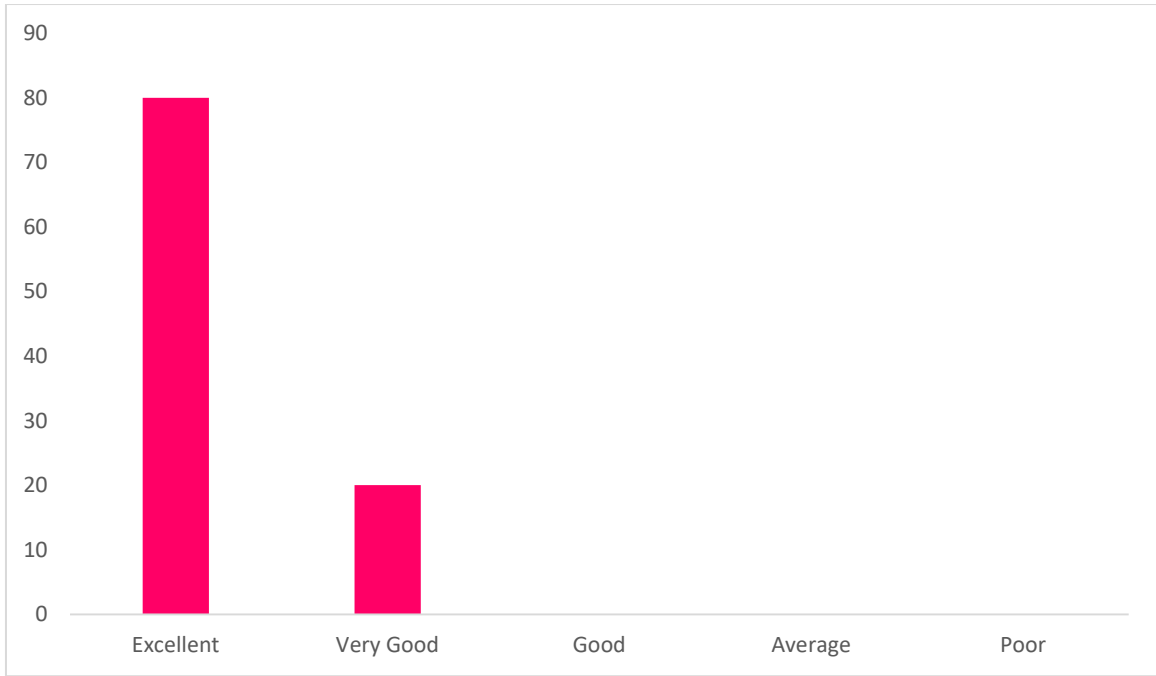

The next 4 questions in the employee feedback form were related to the curriculum and the impact in industry and the relevance of experiments in the curriculum with real life. Forty percentage of the employee responded very good and 60% responded excellent (Fig. 5). Sixty percent responded excellent for elective papers in curriculum in relation to the technological advancement and 20% responded very good (Fig. 6).
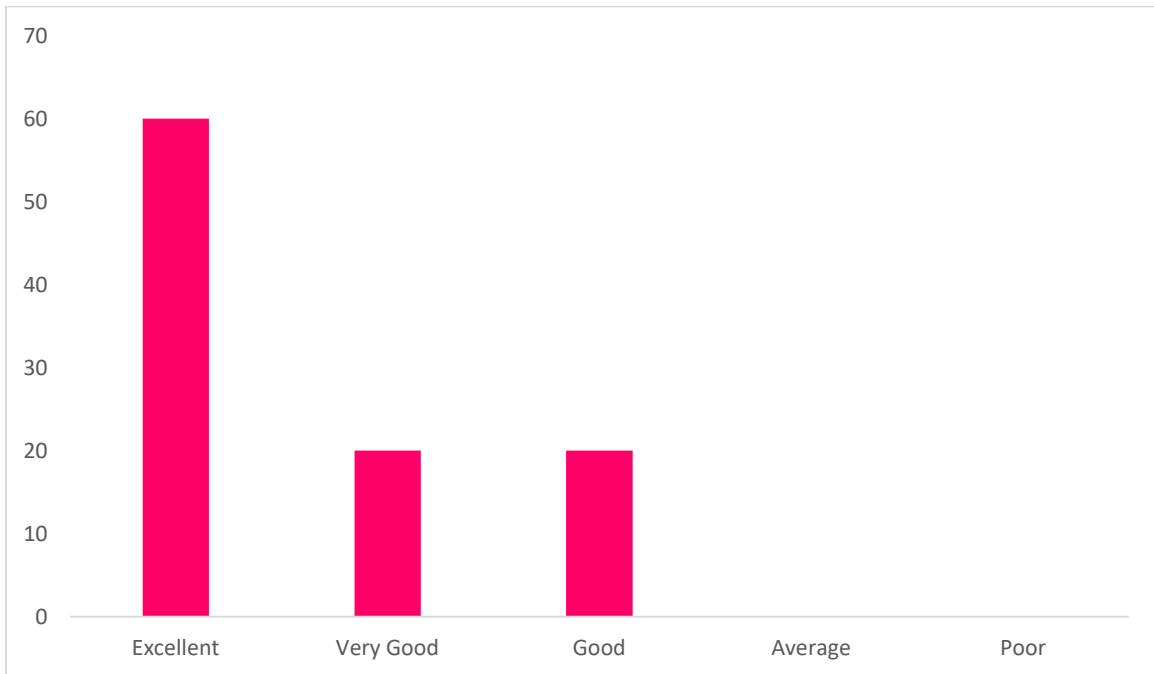

More than 50% responded excellent for the experiments included in the curriculum which helped for their industrial and real life applications (Fig. 7 and Fig. 8). The entire employees rated excellent with the students working with them (Fig 9).
